# July 5 - 7, 2004

## Royal Sonesta Hotel

Cambridge, Massachusetts USA

The **DYCOPS 7** Symposium brings together engineers and scientists from universities, R & D laboratories and the process industries to focus attention on new methodologies and challenging applications in the following areas of **D**ynamics and **C**ontrol of **P**rocess **S**ystems (DYCOPS).

Organized under the auspices of the International Federation of Automatic Control (IFAC), the DYCOPS Symposium Series is a continuing series of international conferences held most recently in Korea (2001) and Greece (1998). These meetings focus on advances in methods for control and modeling for all types of chemical processes and are part of a three-year rotation of IFAC meetings in process control, which also include the IFAC ADCHEM series.
