

# Users Guide

This is the electronical version of the Preprints of the 10<sup>th</sup> International IFAC Symposium on Computer Applications in Biotechnology (CAB 2007) and the 8<sup>th</sup> International IFAC Symposium on Dynamics and Control of Process Systems (DYCOPS 2007) taken place on June 4 – 8th, 2007 in Cancún, Mexico.

In order to ensure a comfortable orientation, you have two main possibilities to find a specific paper you search:

## 1.) Trough the technical congress program:

The program is organized in the same way as it was the congress. So reminding the day or the session you just go to the specific site (e.g. Wednesday Morning, Optimization and MPC) and click on the corresponding field, naming the article you are looking for.

**Note:** *The article opens in a new window. So, changing to the original window you may still search further articles of your interest.*

## 2.) Trough the authors index:

If you search an article of a specific author, click on the initial page of the corresponding congress on Authors Index. There, in the second line some links are offered carrying you directly to the specific letter (of the second name) you are searching for. Find the author and click on the page number after the authors name.

### **Note:**

- *The page numbers correspond to the numeration in the memory preprints, so they are organized by volumes. Thus e.g. CAB\_2DYCOPS\_1 stands for Volume 1 of DYCOPS which is identical to Volume 2 of CAB, corresponding the congress structure at wednesday).*
- *The article opens in a new window, so changing to the original window you may still search further articles of your interest.*
