INVITED PAPERS

Keynote Address: The Coming Change in the Chemical Industry 3
Patrick Gruber

INTEGRATED PRODUCT AND PROCESS DESIGN

Towards a Product-Centered Chemical Industry: Rethinking the Role of R&D and its Interaction with Marketing and Business Strategy *(paper not available)*
George Stephanopoulos

The Integration of Process and Product Design 7
James Wei

Applications of High-Throughput Methodologies to Product and Process Design *(abstract only)* 19
W. Henry Weinberg

EDUCATION, TRAINING AND INDUSTRIAL NEEDS IN PRODUCT AND PROCESS DESIGN

Chemical Product and Process Design Education 23
Warren D. Seider, J.D. Seader and Daniel R. Lewin

Fostering Design Innovation in the University *(abstract only)* 37
Karl T. Ulrich

Chemical Product Design 39
Edward L. Cussler and G.D. Moggridge

ENABLING TECHNOLOGIES IN PRODUCT AND PROCESS DESIGN: MODELING AND SIMULATION

Modeling and Simulation in 2004: An Industrial Perspective 55
Herbert Britt, Chau-Chyun Chen,
Vladimir Mahalec and Andrew McBrien

Process Modelling Technology: A Critical Review of Recent Developments 69
Constantinos C. Pantelides and Zbigniew E. Urban

Molecular-Modeling Methods and Use for Product and Process Design 83
Phillip R. Westmoreland and Athanassios Z. Panagiotopoulos

ENABLING TECHNOLOGIES IN PRODUCT AND PROCESS DESIGN: OPTIMIZATION METHODS AND APPLICATIONS

Challenges and Research Issues for Product and Process Design Optimization 99
Lorenz T. Biegler and Ignacio E. Grossmann

Recent Advances and Trends in Global Optimization: Deterministic and Stochastic Methods 119
Panos M. Pardalos and Fabio Schoen

De Novo Protein Design: An Interplay of Global Optimization, Mixed-Integer Optimization and Experiments 133
Christodoulos A. Floudas, John L. Klepeis, J.D. Lambris and Dimitrios Morikis

PRODUCT AND PROCESS DESIGN FOR ENERGY AND THE ENVIRONMENT

Crystal Engineering for Product and Process Design 149
Michael F. Doherty and Daniel A. Green

Model-Based Experimental Analysis: A Systems Approach to Mechanistic Modeling of Kinetic Phenomena 165
Wolfgang Marquardt

Hydrogen as an Energy Carrier – Its Promises and Challenges 185
Rakesh Agrawal

ENABLING TECHNOLOGIES IN PRODUCT AND PROCESS DESIGN: OPERATIONS

Hybrid Systems Modeling, Parametric Programming, and Model Predictive Control – Impact on Process Operations 195
Vivek Dua, Efstratios N. Pistikopoulos and Manfred Morari

Design and Operation of Supply Chains in Support of Business and Financial Strategies *(paper not available)*
Conor M. McDonald and Gintaras V. Reklaitis

Discovery Informatics: A Model-Driven Multi-Scale Integrated Framework for Product Design and Engineering 205
Venkat Venkatasubramanian, James M. Caruthers, W. Nicholas Delgass

CHALLENGES AND OPPORTUNITIES IN SYSTEMS BIOLOGY

Challenges of Computer-Aided Design of Bioprocess: Opportunities Presented by Systems Biology 209
Eugene J. Schaefer and Mauricio Futran

Systems Biology: Using Systems Approaches to Manage Biological Complexity 219
Joel F. Moxley and Gregory Stephanopoulos

CONFERENCE SUMMARY *(paper not available)*

CONTRIBUTED PAPERS

PROCESS DESIGN AND SYNTHESIS

Towards the Testing and Validation of Novel Conceptual Process Design Frameworks 231
A.N. Ajah, P.L.J. Swinkels and J. Grievink

Economics and Energy Efficiency in the Conceptual Design of Reactive Distillation Processes 237
C.P. Almeida-Rivera, P.L.J. Swinkels and J. Grievink

A Multiscale and Bayesian Framework for Environmentally Conscious Process Design 241
Bhavik R. Bakshi and Nandan U. Ukidwe

Combining Conceptual and Detailed Methods for Batch Distillation Process Design 247
Stefan Brüggemann, Jan Oldenburg and Wolfgang Marquardt

Development of Feasibility Criteria for Batch and Continuous Reactive Distillation 251
James Chin, Zhe Guo and Jae W. Lee

Synthesis of Flotation Based Separation Systems 255
Luis A. Cisternas, Edelmira D. Gálvez, Rodrigo E. Jonquera and David A. Méndez

Optimal Batch Distillation Sequences Using Aspen Plus® 259
Bradley H. Cook, Matthew J. Engel, Craig S. Landis, Steven J. Tedeschi and Anthony J. Zehnder

Multiscale Modeling for Electrode Voltage Optimization in the Design of a Carbothermic Aluminum Process 265
Dimitrios I. Gerogiorgis and B. Erik Ydstie

Designing Complex Reactive Columns with Feasible Regions to Optimize Feed Distribution, Catalyst Placement, and Column Pressure 269
Warren Hoffmaster and Steinar Hauan

A Quantitative Comparison of Steady-State Designs for Reactive Distillation and Conventional Reactor/Column/Recycle System 273
Devrim B. Kaymak, William L. Luyben and Oliver J. Smith IV

Process Modification Through Visualization and Inclusion Techniques for Property-Based Integration 279
V. Kazantzi, Q. Xiayoun , F. Gabriel, D. Harell, and M.M. El-Halwagi

Design for Environment (DfE) Methodology using Novel VE-based Product and Process Model, and TRIZ-based Innovation Principles in Consideration of Product Lifecycle 283
Norie Kobayashi and Atsushi Aoyama

A Rapid Design Method for Water-Using System with Multiple Contaminants 287
Baohong Li, Yan Ren and Weiyang Fei

Conflict-Based Method for Conceptual Process Synthesis 291
Xiaoning Li and Andrzej Kraslawski

A Simultaneous Optimization Approach for Synthesis of Flexible Heat Exchange Networks with Uncertain Temperatures and Flowrates 295
Cheng-Liang Chen and Ping-Sung Hung

Exploiting the Use of Equation-Oriented Modeling for Design-type Problems 299
John Myers and Peter Hanratty

A Comparison of Strategies for Optimization of Complex Distillation Columns 303
Filipe J.M. Neves and Nuno M.C. Oliveira

Water Network Optimization for Energy Savings and Discharge Reduction: A Different Perspective on a Critical Problem for the Chemical Industry 307
Gautham Parthasarathy

Generalized Modular Framework for Distillation Column Synthesis 311
Petros Proios and Efstratios N. Pistikopoulos

A Methodology for the Analysis and Design of Reaction-Separation-Recycle Systems 315
Edgar Ramírez and Rafiqul Gani

Robust and Efficient MINLP Optimization of Reactive Distillation Columns 319
G. Sand, S. Barkmann, M. Tylko, S. Engell and G. Schembecker

A Hierarchical Methodology for Chemical Process Design Based on Life Cycle Assessment 323
Hirokazu Sugiyama, Masahiko Hirao, Ulrich Fischer and Konrad Hungerbuehler

Design for Process Security 329
Korkut Uygun, Yinlun Huang, and Helen Lou

Optimization for Screening Design of Sustainable Domestic Water Systems 333
Annelies van der Vleuten-Balkema, Heinz A. Preisig and Ralf Otterpohl

PRODUCT DESIGN AND DISCOVERY

Educational Tool for Design of Wastewater Treatment and Water Reuse Systems 339
Yuri Avramenko and Andrzej Kraslawski

An Adaptive Reduction Scheme to Develop Flexible Reduced Chemistry Models for Reactive Flow Simulations 343
Ipsita Banerjee and Marianthi Ierapetritou

Pharmaceutical Products-Only Design 347
Aninda Chakraborty, Andres Malcolm and Andreas A. Linninger

A Methodology for Optimal Solvent Design for Reactions 353
Milica Folić, Claire S. Adjiman and Efstratios N. Pistikopoulos

Configuration Design for Plate Heat Exchangers and Pasteurizers: Mathematical Modeling and Optimization Methods 357
Jorge A.W. Gut and José M. Pinto

Decomposed CAMD Strategy for Solvent Mixture Design 361
Arunprakash T. Karunanithi, Luke E.K. Achenie and Rafiqul Gani

Ab Initio Prediction of the 3-Dimensional Structure of a De Novo Designed Protein : A Double Blind Case Study 365
John L. Klepeis, Christodoulos A. Floudas, Yinan Wei and Michael H. Hecht

Defect-free Products through Integrated Design and Control 369
Daniel R. Lewin

The Statistical Simplex Method for Experimental Design in Process Optimization 373
Ernesto Martinez

Optimal Design and Operation of Fuel Cell Systems for Micro Power Generation 377
Alexander Mitsos and Paul I. Barton

Optimal Design of Microscale Separation Systems Using Distributed Agents 381
Anton J. Pfeiffer, John D. Siirola and Steinar Hauan

Workflow and Regression Methods for Determining Solid-Liquid Phase Diagrams 385
Ketan D. Samant, Lionel O'Young, Martin Kwok and Ka M. Ng

A Unified Correlation for Prediction of Pure Component Properties Based on Similarity of Molecular Descriptors of Various Compounds 391
Mordechai Shacham, Neima Brauner, George St. Cholakov and Roumiana P. Stateva

Structural Synthesis of Small Molecule Drug Candidates 395
Metin Türkay

Optimization-Based Synthesis of Purification Steps in Protein Production Processes 399
Elsa Vasquez-Alvarez and Jose M. Pinto

Decision Analysis as a Project Management Tool for Product and Process Design 405
Terhi Virkki-Hatakka, Krisztina Cziner, Ilkka Turunen and Markku Hurme

An Information Based Genetic Algorithm Approach to Fast Peptide Docking 409
Chen-Wei Yeh, Ji-Zheng Chu, Shi-Shang Jang, David Sun-Hill Wong

Application of Computational Molecular Design to Gene Delivery Polymers 415
Hui Zhao, John Ralston, Russell C. Middaugh and Kyle V. Camarda

PROCESS OPERATIONS: CONTROL, IDENTIFICATION, PLANNING AND SCHEDULING

New Paradigm in Instrumentation Network Design and Upgrade 421
Miguel Bagajewicz and Ariel Uribe

A Multi-Hierarchical Decision Support System for Strategic and Tactical Management R&D Portfolios 425
G.E. Blau, J.F. Pekny and V.A. Varma

Design and Scheduling of Multipurpose Plants using a RTN Continuous-Time Formulation 431
Pedro Castro, Ana Barbosa-Póvoa and Augusto Novais

Supply Chain Optimization: Short Term Production Planning and Distribution Decisions for a Petrochemical Complex 435
S. Diaz, E. Schulz and J.A. Bandoni

Environmentally Conscious Process Planning Under Uncertainty 439
André Hugo and Efstratios Pistikopoulos

Fuzzy Classification with an Artificial Chemical Process 443
Roberto Irizarry

An Improved Continuous-Time Formulation for Short-Term Scheduling with Resource Constraints 447
Stacy L. Janak, Xiaoxia Lin and Christodoulos A. Floudas

Process Systems Engineering (PSE) Applications in Integrated Circuit (IC) Manufacturing 453
D. R. Lewin, Shalem, B. Grosman, S. Lachman-Shalem and E. Dassau

A Nonconvex MINLP Optimization Problem in Reactor Design and Production Assignment: Its Formulation and Global Solution 457
Xiaoxia Lin, Christodoulos A. Floudas and Josef Kallrath

A Novel Agent-Based Approach for Supply Chain Retrofitting 461
Fernando Daniel Mele, Gonzalo Guillén, Francisco Urbano, Antonio Espuña and Luís Puigjaner

Optimal Design and Operation of SOFC System for Rapid Start-Up 465
Masaru Noda, Hiroshi Kuraseko, Shinji Hasebe, Hitoi Ono, Takashi Sonoda and Yuichi Ohtani

Runaway Prevention in Cumene Hydroperoxide Storage Tanks 469
Laura Pellegrini, Susi Bonomi and Sara Brambilla

A Case Study on the Design of Pharmaceutical R&D Licensing Deals 475
Michael J. Rogers, Min Ding and Costas D. Maranas

An Innovative Optimization-Based Services & Solutions Offering Identifies the Lowest Cost Solution to Achieve Emission Level Compliance 481
Derrick P. Schertz, Joseph F. Pekny, Richard E. Mc Allister, Beth Brandes Jenkins, Bruce E. Snyder, Semra Alici, Edward J. Galligan, Carlos A. Valenzuela, and Mark M. Daichendt

Improved Performance in Process Plant Layout Problems using Symmetry-Breaking Constraints 485
Joakim Westerlund and Lazaros G. Papageorgiou

Modeling the Process Operations Decision Cycle: Economic Implications 489
Douglas C. White

Hierarchical Approach for Production Planning and Scheduling Under Uncertainty 495
Dan Wu and Marianthi Ierapetritou

MODELING, OPTIMIZATION AND UNCERTAINTY

The Role of the Off-Diagonal Elements of the Hessian Matrix in the Construction of Tight Convex Underestimators of Nonconvex Functions 501
Ioannis G. Akrotirianakis, Clifford A. Meyer and Christodoulos A. Floudas

Robust Operational Process Design Optimization under Uncertainty 505
Harvey Arellano-Garcia, Walter Martini, Moritz Wendt and Güenter Wozny

A Contraction Based Approach for Flowsheet Solving Stategies using Interval Global Optimization Methods 509
S. Balendra and I.D.L Bogle

Logic Based Outer Approximation for Non Convex Synthesis of Process Network Problems 513
Maria Lorena Bergamini, Pio A. Aguirre and Ignacio Grossmann

Re-Design of the Tennessee Eastman Challenge Process: An Eigenvalue Optimization Approach 517
Aníbal M. Blanco, J. Alberto Bandoni and Lorenz T. Biegler

Multicriteria Optimization of Chemical Processes under Uncertainty 521
I.V. Datskov, G. M. Ostrovsky and L.E.K. Achenie

A Novel MINLP-Based Representation of the Original Complex Model for Predicting Gasoline Emissions 525
Kevin C. Furman and Ioannis P. Androulakis

Deterministic Global Optimization of Mixed Integer Bilevel Programming Problems 529
Zeynep H. Gümüs and Christodoulos Floudas

Stochastic Framework for Modular Design Generation 533
Marianthi Ierapetritou and Vishal Goyal

Implementing SAFT-based Thermodynamics in Process Modelling Tools 537
Nikolaos M.P. Kakalis, Anthony I. Kakhu and Constantinos C. Pantelides

Multi-Objective Optimization Approach for Robust Design under Uncertainty 541
Soorathep Kheawhom and Masahiko Hirao

Optimization of Gas Turbine Using NLP Model 545
Anita Kovač Kralj and Peter Glavič

Sensitivity Analysis of Changing Parameters in Methanol Process 549
Anita Kovač Kralj and Peter Glavič

Feasibility Analysis and Optimal Design using a Chance Constrained Programming Framework 555
Pu Li, Ri Hai and Günter Wozny

Non-Quadratic Methodologies for Process Optimization 561
Angelo Lucia and Peter A. DiMaggio

Convex Underestimation of C^2 Continuous Functions by Piecewise Quadratic Perturbation 565
Clifford A. Meyer and Christodoulos A. Floudas

Design of Complex Systems under Uncertainty Using Process Simulators 569
Alberto J. Olvera and Joaquin Acevedo

Parallel Contraction of Variable Space for Global Solution of NLP'S 573
Pradeep K. Polisetty and Edward P. Gatzke

Resin Design and Optimization: High-Temperature (140-200 C) n-Butyl Acrylate Polymerization 577
Felix S. Rantow, Masoud Soroush and Michael C. Grady

A Modeling Framework for Chemical Process Design through a Computer-Aided System 581
Mauricio Sales-Cruz and Rafiqul Gani

Computational Experience with LogMIP Solving Linear and Nonlinear Disjunctive Programming Problems 587
Aldo Vecchietti and Ignacio Grossmann

From Conceptualization to Model Generation: the Roles of Ontologies in Process Modeling 591
Aidong Yang, Jan Morbach and Wolfgang Marquardt

AUTHOR INDEX 597
